## OPERR Work Business Management Platform

Easily Track & Manage Employees, Overtime Costs, Employee-Client Relationships, Team Projects, Assignments, Tasks, Expenses, Payroll & Much Much More!

[www.operrwork.com](http://www.operrwork.com)

## About The OperrWork Platform

The OperrWork Enterprise system is an innovative process management solution that streamlines the flow of information between Companies, Industry or any work environment and their employees/clients. The Enterprise platform greatly improves operational efficiencies without sacrificing regulatory compliance. Our multilateral web-based solution includes tools such as:

### Employee Management

Help to ensure each employee is performing their best in order to achieve the organizational goals. Keep track of employee information, and provide the best way to retrieve your data.

- HR Tools Built-In
- Manage Staff & Departments
- Manage Hours & Overtime
- Create Staff Assignments

### Easy & User Friendly

Because our system is cloud based. It's flexible and can be accessed everywhere around the world via website, iOS and Android.

## More Service Benefits

**Task Management:** Visual collaboration tools that enables you to organize and prioritize projects in a flexible way. From our board is a series of lists, with a bunch of cards attached and packed full with powerful features and automation.

**CRM:** Our Customer Relationship Management feature enables businesses to use cloud technology to better connect with customers, partners and potential customers and makes sure records are kept when employees are not.

**OT Prevention:** OperrWork provides a tool that helps businesses assess overtime costs. It is able to forecast overtime based on existing employee hours, employment agreements and other metrics, to forecast and make sure you know about potential cost overruns before they happen.

**Reporting:** OperrWork provides in-depth reports using the latest data analytics methodology and employee metrics gathered during standard business operations. The platform can analyze these data points and present them in a powerful and easy to read report.

## Other Highlights

**Mileage Tracking:** Our system creates Accurate Mileage Tracking by automating complex routing strategies with GPS tracking, geo-fences. After a user clocks in to start work on our mobile app, OperrWork automatically tracks and records the miles driven for work. This makes expense tracking and reporting a breeze.

**Balance OT:** In case an employee previously work over time and you don't want to go beyond your budget the system also allowed highest authority to take the time back, by using our special tools.

**Time & Attendance:** These tools keeps you up to date about your employees' hours, so you can know who is working and can forecast their time to prevent unnecessary Overtime. And if really need OT, we also allowed to take time back to keep your budget stable.
